Applied Business Analytics
Practical – IV

Roll No.: T031	Name: Ishita Patel
Class: TYIT	Batch: 2
Date of Assignment: 04/09/2026	Date/Time of Submission: 04/09/2026

4. Business Intelligence Tools for Data Analysis:

a. Utilize a business intelligence tool (e.g., Tableau, Power BI) to extract insights from a dataset and create interactive visualizations for effective data analysis.

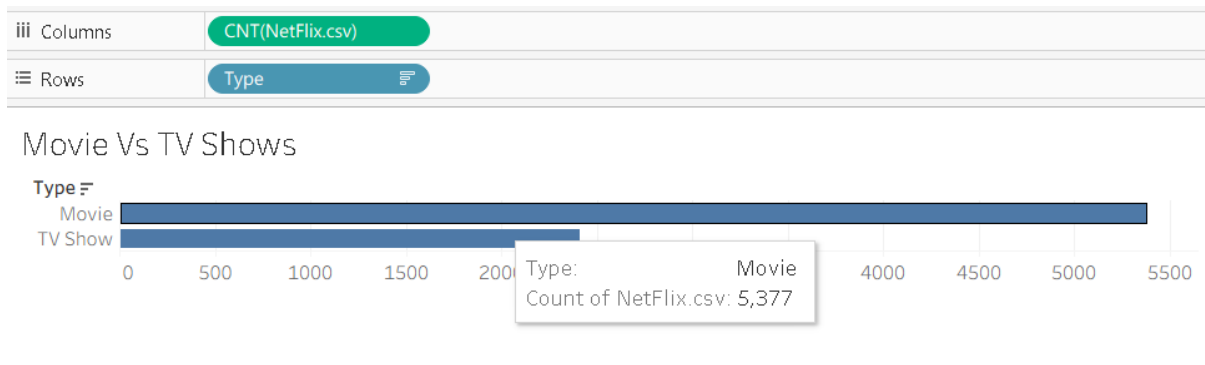

Step 1: Open the Netflix.csv and you will see these details in table

Data	Analytics
NetFlix	
Search	
Tables	
Abc	Cast
Abc	Country
Abc	Date Added
Abc	Description
Abc	Director
Abc	Genres
Abc	Rating
#	Release Year
Abc	Show Id
Abc	Title
Abc	Type
Abc	Measure Names
#	Duration
Abc	Latitude (generated)
Abc	Longitude (generated)
#	NetFlix.csv (Count)
#	Measure Values

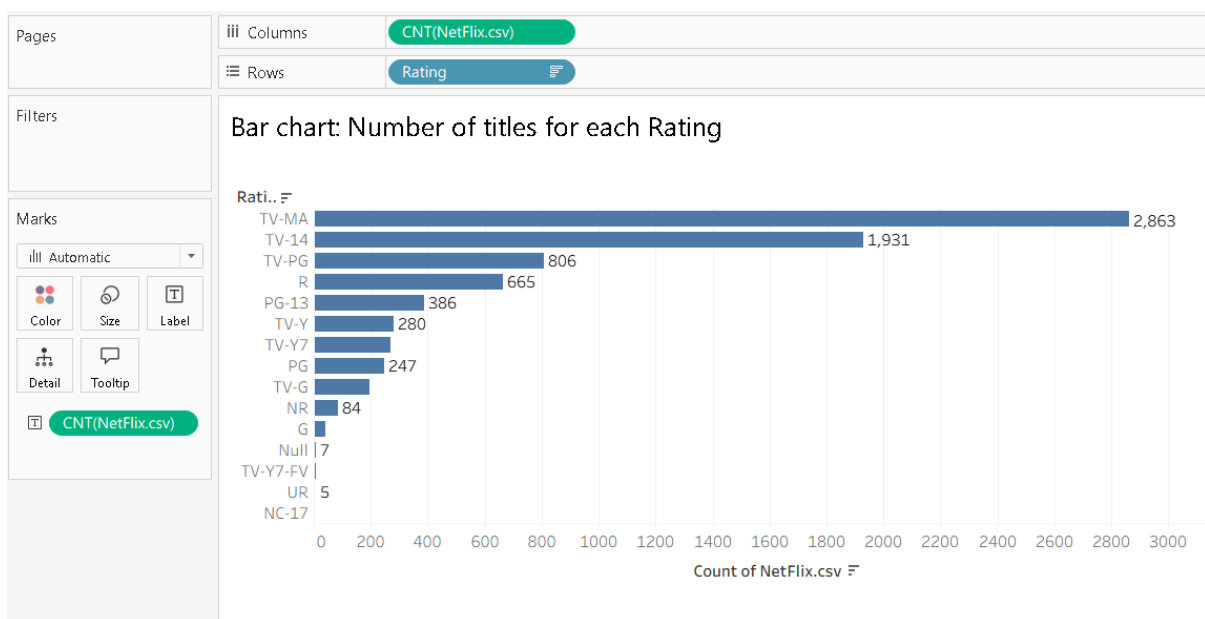

Step 2: Now take Neflix.csv(count) and move it to text

Filters	Netflix Dataset 7,787
Marks	
Automatic	
Color	Size
Detail	Tooltip
CNT(NetFlix.csv)	

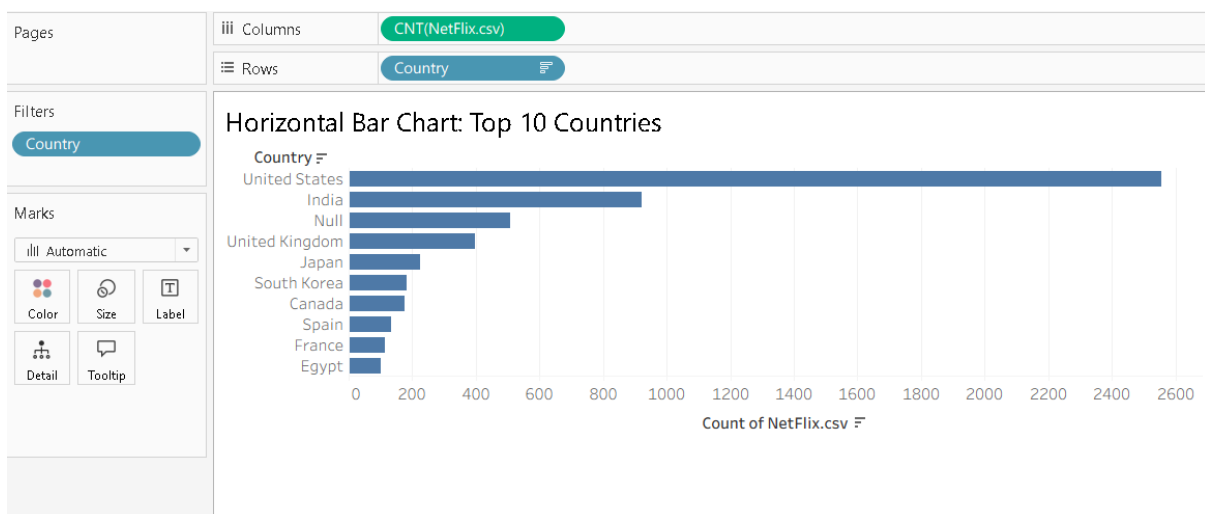

Step 3: Now make a Sheet named Movie Vs TV Shows and take Netflix.csv in column and type to Rows

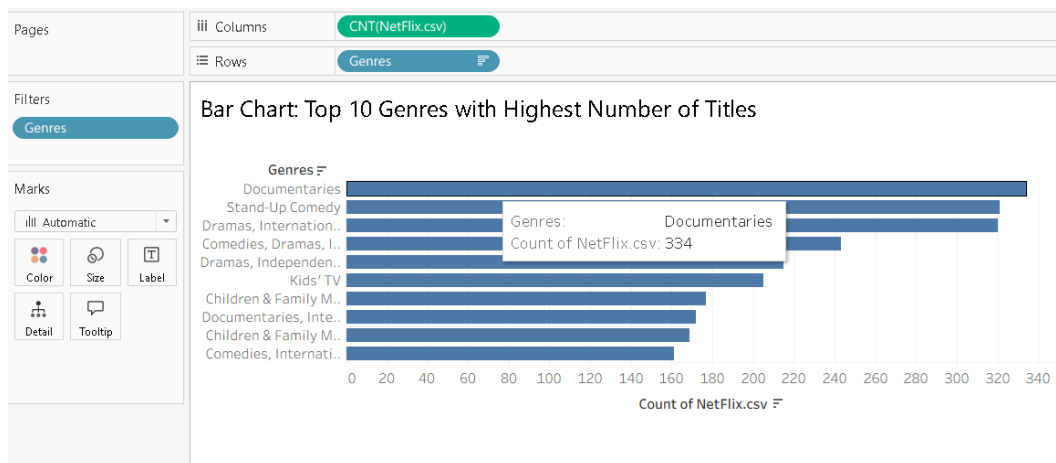

Step 4: You will see Bar chart: Number of titles for each Rating

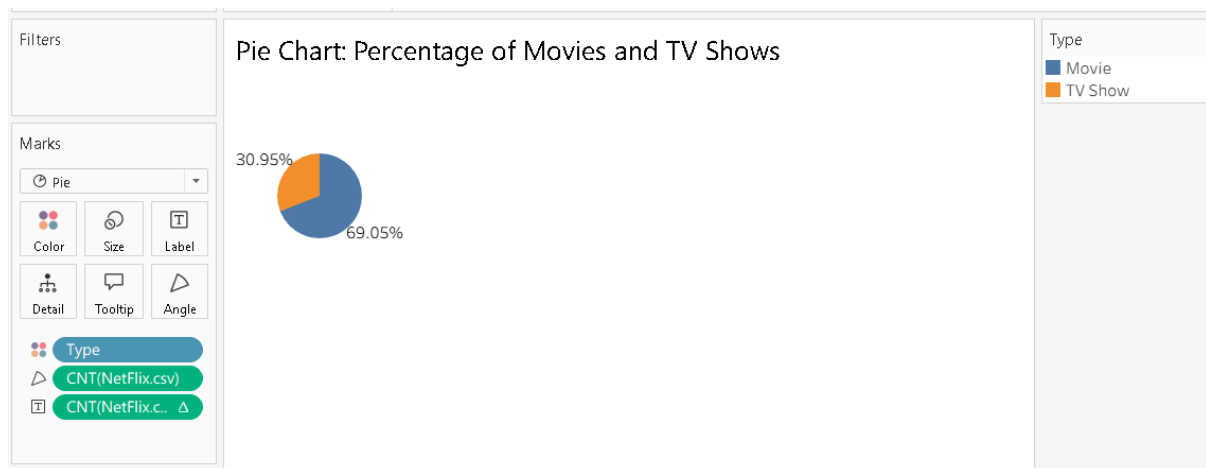

Step 5: In new sheet name it Horizontal Bar Chart: Top 10 Countries and use column and rows and filter country as top 10.

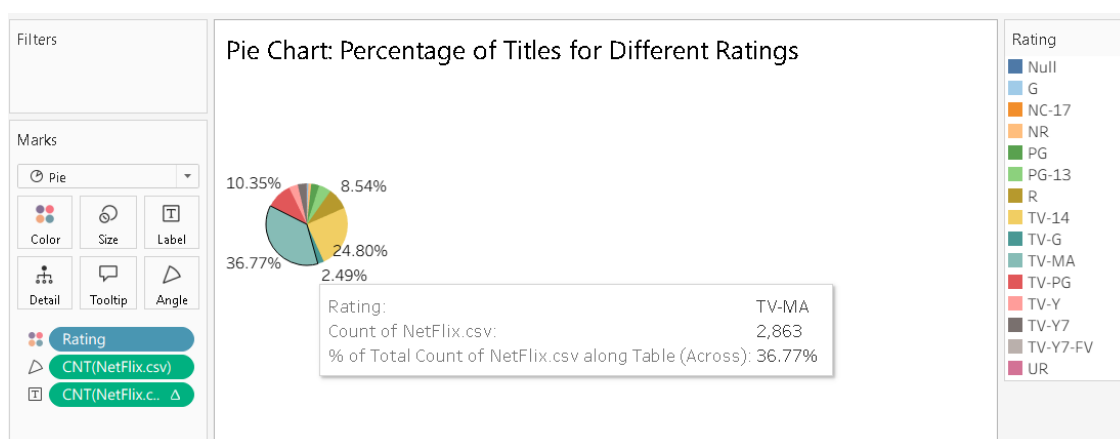

Step 6: Make new sheet for Bar Chart: Top 10 Genres with Highest Number of Titles filter it and it will show highest number by Genres

Step 7: Now select the below in color,angle,label and it will show the Pie Chart: Percentage of Movies and TV Shows

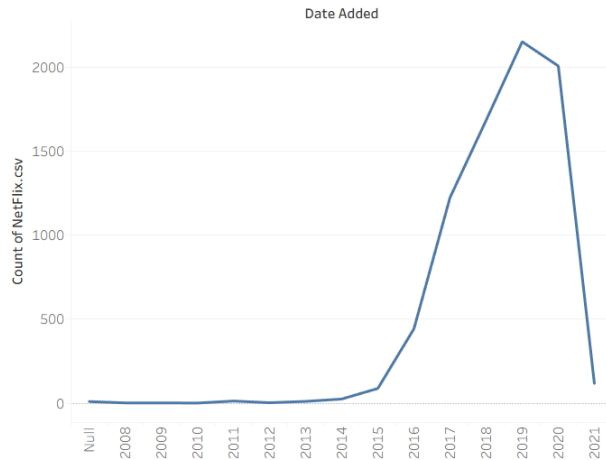

Step 8: You will see the Pie Chart: Percentage of Titles for Different Ratings by choosing options and it will show rating on percentage

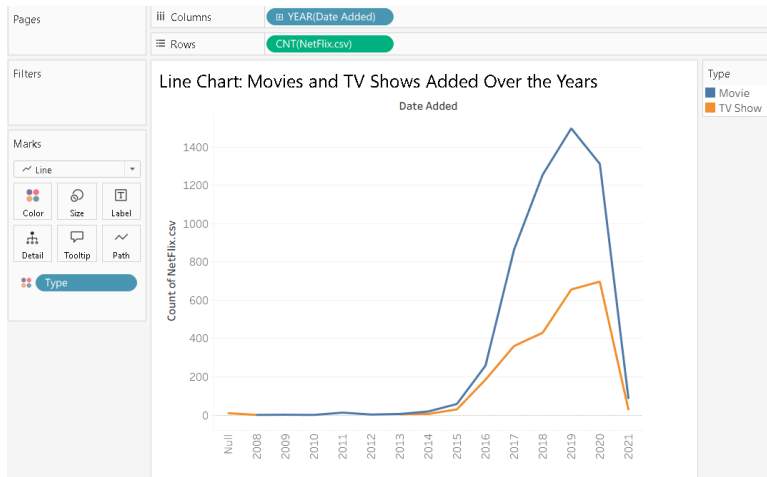

Step 9: Now you will see Line Chart: Number of Netflix Titles Added in Each Year

Columns	YEAR(Date Added)
Rows	CNT(NetFlix.csv)

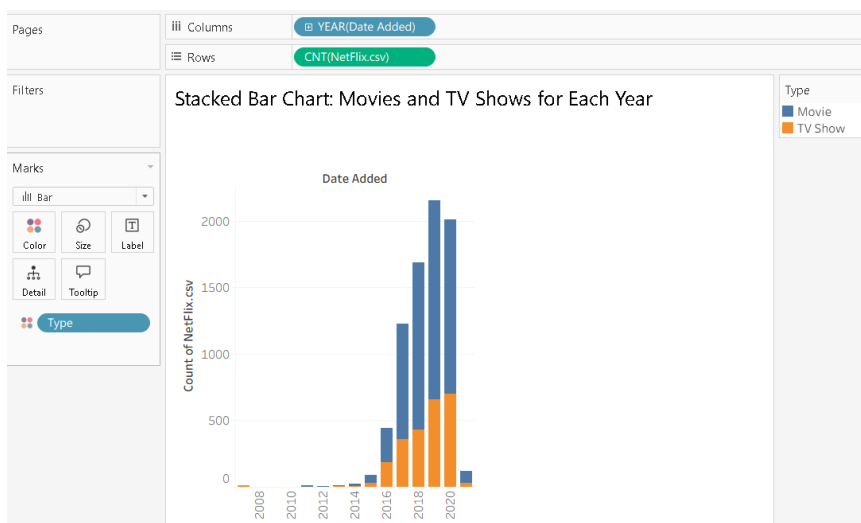

Line Chart: Number of Netflix Titles Added in Each Year

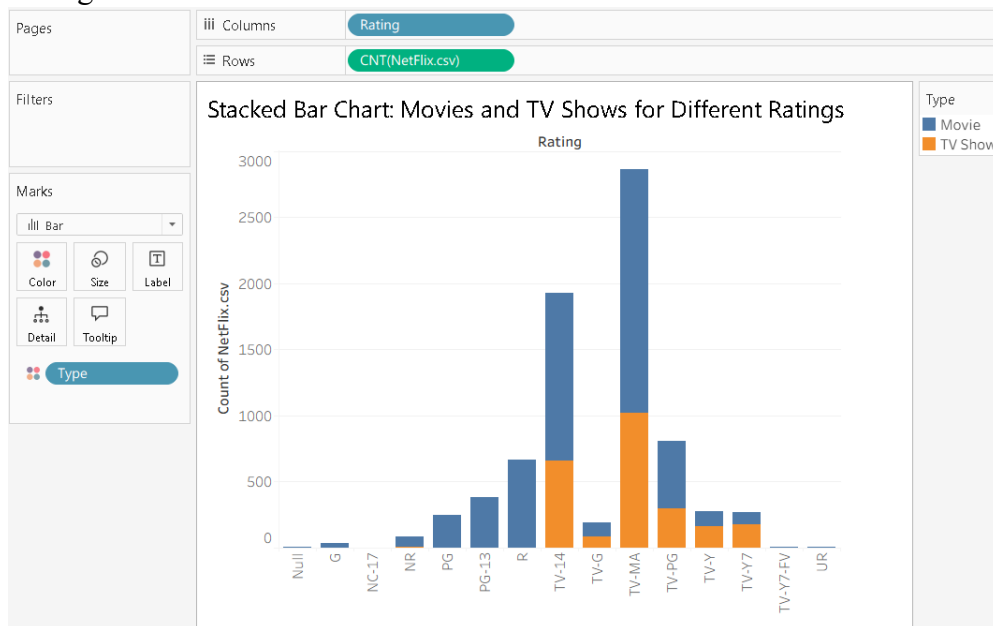

Step 10: Now it shows Line Chart: Movies and TV Shows Added Over the Years

Step 11: Now do the steps for Stacked Bar Chart: Movies and TV Shows for Each Year shown below

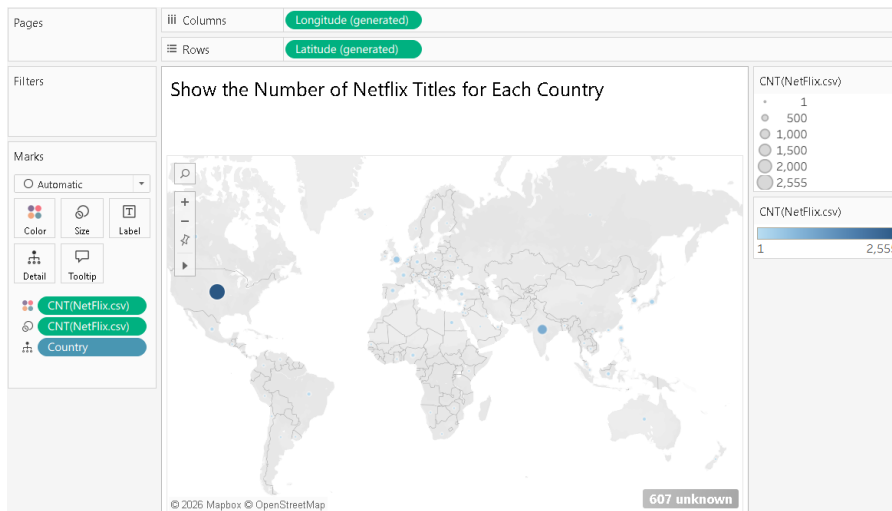

Step 12: Now make sheet name Stacked Bar Chart: Movies and TV Shows for Different Ratings and do as shown below

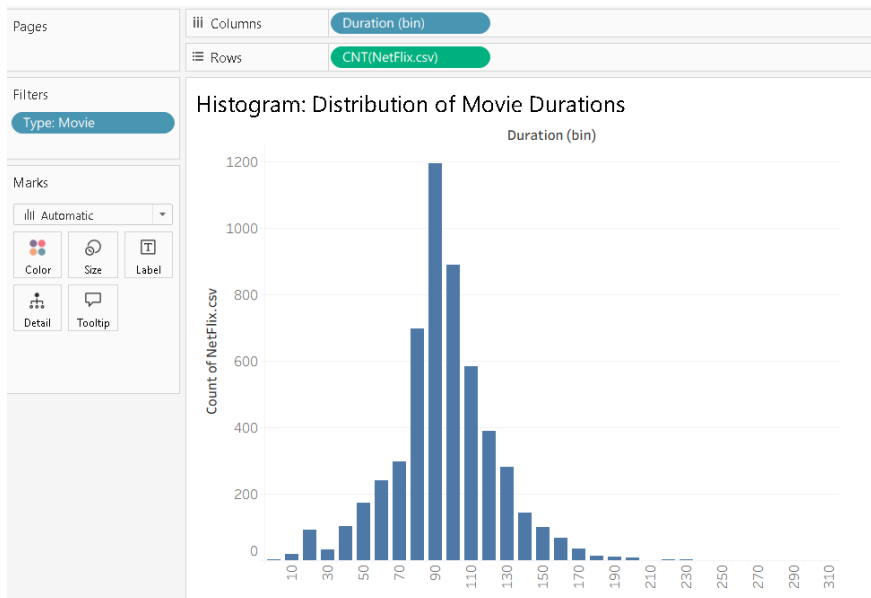

Step 13: For Map: Countries from Which Netflix Titles Are Available double click on country then do as shown below

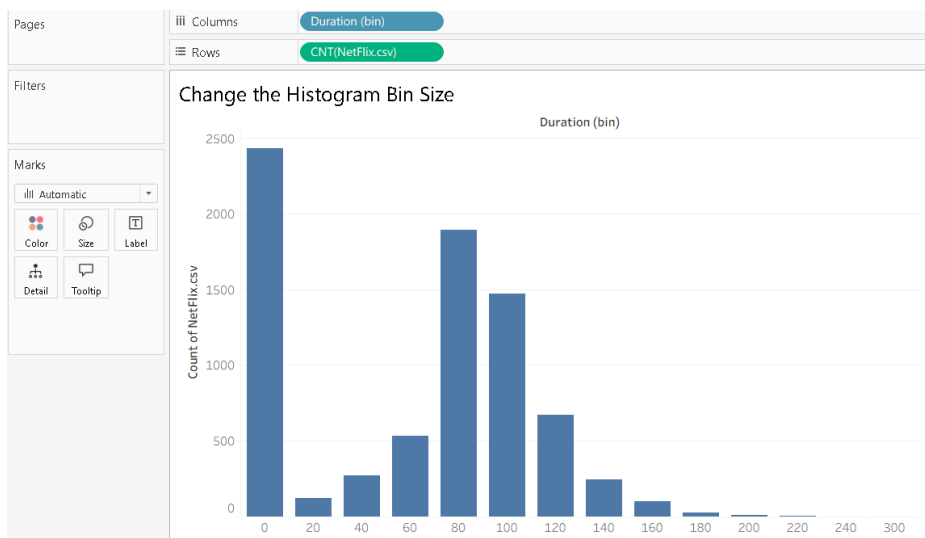

Step 14: For Show the Number of Netflix Titles for Each Country

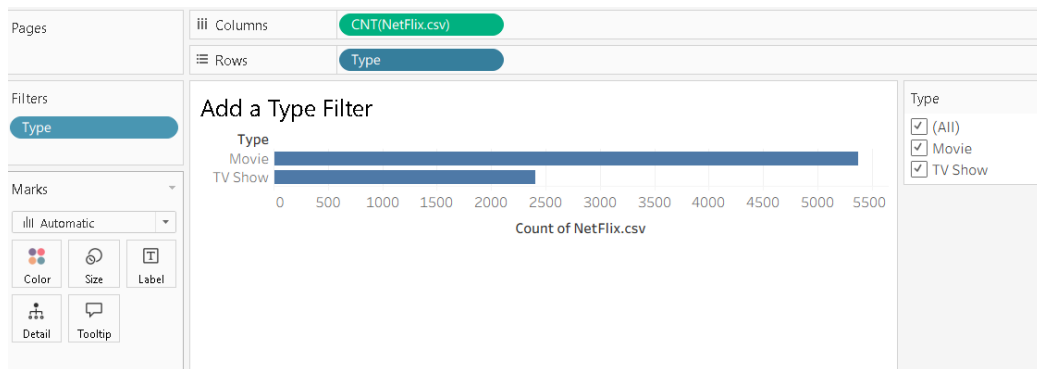

Step 15: For Histogram: Distribution of Movie Durations

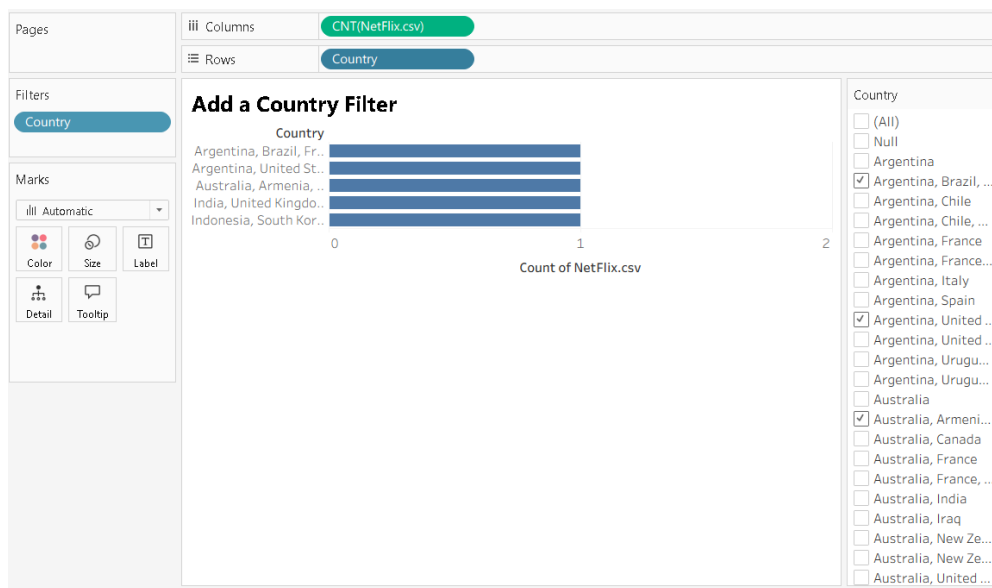

Step 16: I need to change the Duration bin from 10 to 20 and below will be the output

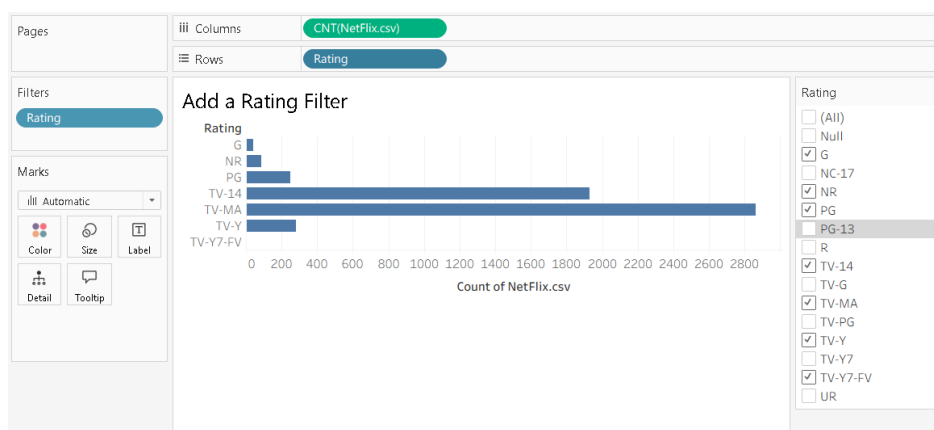

Step 17: For Add a Type Filter

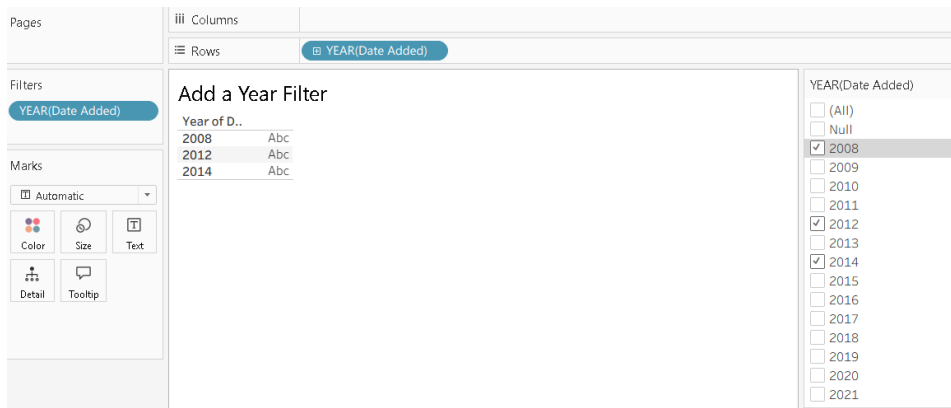

Step 18: For Add a Country Filter

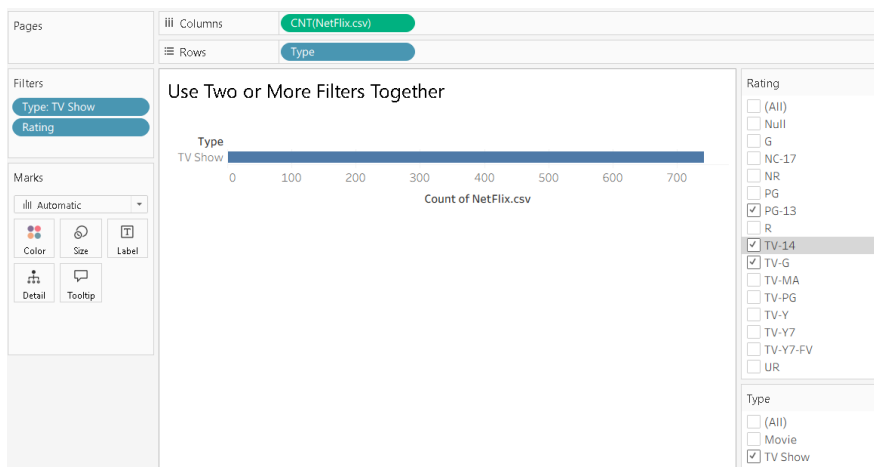

Step 19: For Add a Rating Filter

Step 20: For Add a Year Filter

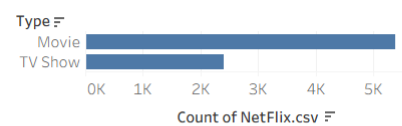

Step 21: For Use Two or More Filters Together

Step 22: For the Tableau Dashboard

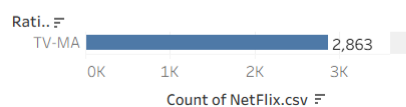

Movie Vs TV Shows

Pie Chart: Percentage of Titles for Different Ratings

Pie Chart: Percentage of Movies and TV Shows

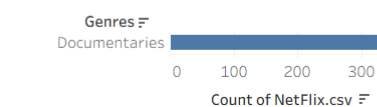

Bar chart: Number of titles for each Rating

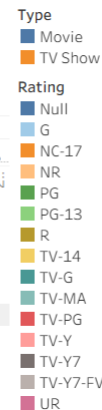

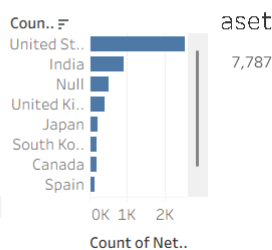

Line Chart: Number of Netflix Titles Added in Each Year

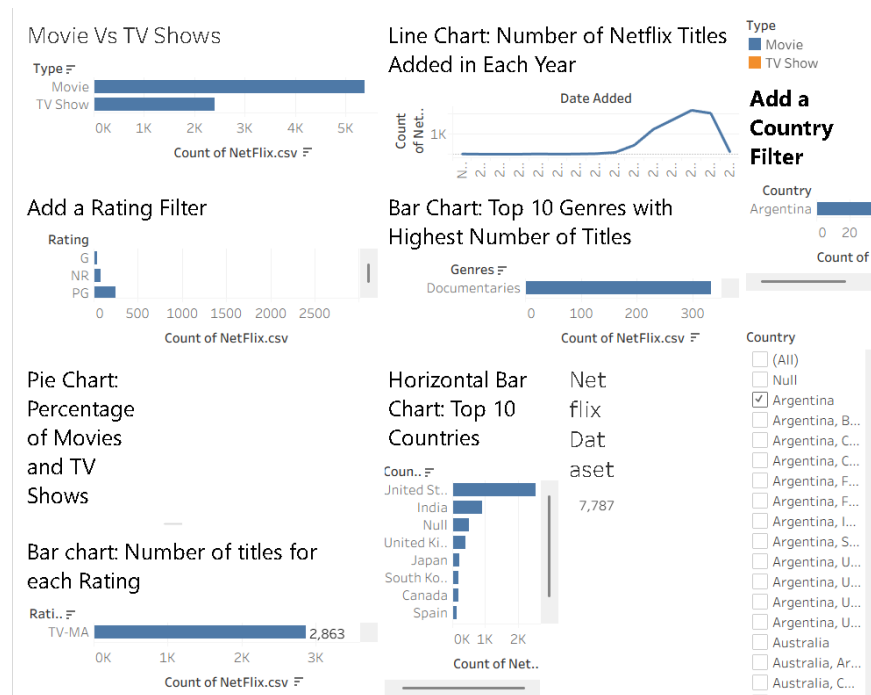

Bar Chart: Top 10 Genres with Highest Number of Titles

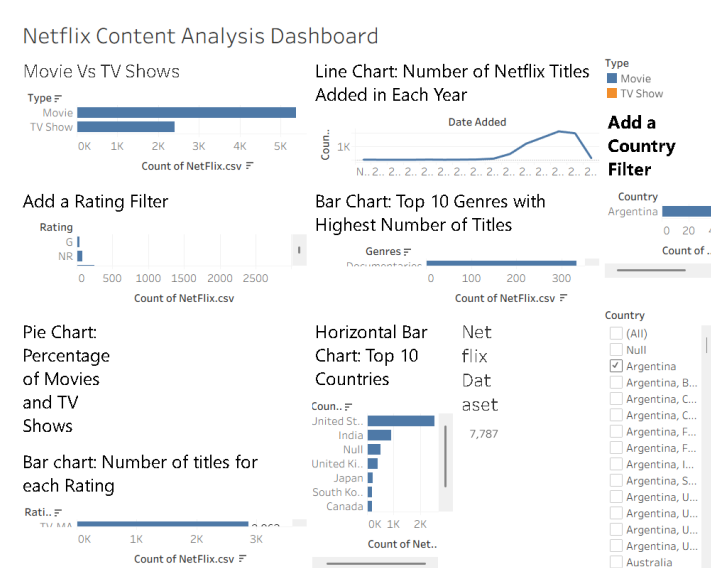

Horizontal Bar Chart: Top 10 Countries

Step 23: Add Interactive Filters to the Dashboard for Movie Vs TV Shows, Country filter, Rating filter

Step 24: For Netflix Content Analysis Dashboard change the title of dashboard

E. Find Insights from the Data

1. Which type of content is available more on Netflix: Movies or TV Shows?

Answer: Movies are available more on Netflix than TV Shows. The number of Movie titles is higher than the number of TV Show titles in the dataset.

2. Which country has the highest number of Netflix titles?

Answer: The United States has the highest number of Netflix titles in the dataset.

3. Which Rating has the highest number of titles?

Answer: TV-MA has the highest number of titles among the ratings in the Netflix dataset.

4. Which year had the highest number of titles added to Netflix?

Answer: The year 2019 had the highest number of Netflix titles added in the dataset.

5. Which Genre has the highest number of titles?

Answer: International Movies is the genre with the highest number of titles in the Netflix dataset.

6. Which Movie duration range has the highest number of Movies?

Answer: The movie duration range around 90–100 minutes has the highest number of Movies.

7. Five Important Observations from the Tableau Dashboard

1. Movies constitute a larger portion of Netflix content compared to TV Shows.
2. The United States has the highest number of Netflix titles among the countries.
3. TV-MA is the most common rating in the dataset.
4. Netflix added a large number of titles during the years around 2018–2020, with 2019 having the highest number.
5. Most Netflix movies have durations concentrated around the 90–120 minute range.

8. Three Conclusions about Netflix Content

1. **Netflix has a strong focus on Movies:** The dataset contains considerably more Movies than TV Shows.
2. **The United States is the major content contributor:** The United States has the largest number of titles available on Netflix.
3. **Netflix offers diverse content for mature audiences:** TV-MA is the most common rating, while genres such as International Movies contribute significantly to the platform's content diversity.
